BULBY

UV-Exposure Unit

UV-UNIT „BULBY“ 15W

Our "BULBY" UV exposure unit is produced by ourselves and is intended to give our customers the best possible introduction to the subject of photo engraving with photoresists or UV sandblasting foils.

The exposure area / working area is 430 mm x 250 mm with which almost any project (engraving) can be implemented. The device works so precisely that even the finest drawings and halftone screens can be copied into our special sandblasting films.

Exposure time for SR3000 / SR2000 = 20 seconds

CE certified

Power connection: 240V
