

Roll-to-Sheet Cutter Auto Cutter - 50cm

(Full automatic Sheeter)

Our Roll-to-Sheet - Auto Cutter

Fully automatic cutting of roll material to sheets

Our maintenance-free cutting machine processed reliably and fully automatically all foil material and also papers. Through the freely programmable control of the device, you can set both the number of too intersecting arcs, as well as their exact length determine.

Instead of a circular knife uses our automatic Cutting device is a massive guillotine and thus guarantees clean cuts over a very long period of time. This type of cut prevents unwanted delamination of multi-layer materials, such as our SR3000 or SR2000 film.

Technical Specifications

- Weight 110kg
- External dimensions (W/H/D): 100 cm x 85 cm x 45 cm
- Suitable for 2 inch and 3 inch roll cores
- Max. roll width = 500mm
- Solid steel frame with powder coating
- Electrical connection: 230V, 50Hz // 110V, 60Hz
- Energy requirement: 2 x 0.37 kW
- Max Output = 900 A4 sheets per hour
- Min. cutting length = 20mm

Materials we have already tested

- SR3000 / SR2000 up to 9MIL
- flock foil
- flex foil
- inkjet film
- Silicone paper / release paper
- PE foil 0.05mm
- transfer film
- transfer paper
- vinyl film
- PVC sandblast film
