RZ2 - Adhesive

RZ2 Adhesive (Brush-On Application)

Used for hand brushed applications. This thick milky in color, water based adhesive applies easily and dries to a clear strong, reliable binding agent. RZ2 adhesive is versatile and can be used on many surface types, Fast clean up; no solvents needed.

Rz2-Features

- high water resistance
- originally milky, but transparent when dried
- high adhesion
- quickly drying
- without solvents

How to use:

Apply the Rz2 Adhesive with a foam roller on glass or any other polished materials, a brush to apply it on structured surfaces like on a river stone for eg. or with a sponge. Any structures you bring on the materials with the Adhesive-Coating may be transferred by sandcarving.

If you want to spray an even / exact coating of Adhesive you should work with the Rz3 Adhesive specially made for professional spray-guns, such as like Car Painting Shops are using.

For Headstone Carvers! You need a good Primer, Filler and Adhesive (All in One!) and want to stop working with solvent based products? **Try our new Rz-Filler!**
